The new Scrubmaster B25

More cleaning quality for the smallest floor surfaces!

Walk-behind scrubber-drier for cleaning small areas

Full flexibility for small areas

The new Scrubmaster B25 with PowerFlow system is easy to manoeuvre with little effort. The adjustable handlebar makes it easy to move away from walls and allows cleaning underneath tables, for example.

Ease of use: The clearly arranged control panel with intuitive operating elements is particularly user-friendly.

Always quickly at hand: Thanks to the foldable operating handle, the Scrubmaster B25 can be folded into a compact shape for transport in the boot.

The basis for cleanliness

The new Scrubmaster B25 combines high performance with ease of use in a compact design. With a working width of 43 cm, floors can be cleaned quickly, efficiently and thoroughly with a disc brush or pad. Many well-thought-out details support the user in his daily work. For example, the ergonomically shaped, infinitely height-adjustable handlebar for back-friendly working, the good accessibility of all components facilitating daily maintenance or the cover of the solution tank filler neck, which acts as a dosing aid for cleaning chemicals.

More hygiene: with Hako-AntiBac®, equips the tank with antibacterial properties, and Hako-Aqua-Control

More benefits:

- Tool-free, automatic brush ejection and pick-up system for daily maintenance
- Power-saving: effortlessly easy to operate with Powerflow drive unit
- Adapted: can also be used with Silent mode in noise-sensitive areas and with the antibacterial tank coating Hako-AntiBac® for increased hygiene requirements
- Safety system preventing unwanted water ingress into the suction turbine
- Large fresh water filler neck for fast-fill systems, automatic filling system, bucket filling or filling with water thief

Practical: the optional storage box for cleaning tools or other utensils as well as the optional mop holder with mop.

| Scrubmaster B25 | TB 430 |
|--------------------------------------|---------------------------|
| Working width | 43 cm |
| Squeegee width | 60 cm |
| Theoretical area output | 1,700 m²/h |
| Working speed | 4 km/h |
| Cleaning system | disc |
| Solution/recovery tank | 25 |
| Nominal voltage | 24 V |
| Total output | 0.77 kW |
| Battery capacity | 45 Ah GiV 41 Ah Li-Ion |
| Length with squeegee | 98-120 cm |
| Width without/with squeegee | 52/61 cm |
| Total height | 84-110 cm |
| Weight wet with battery (GiV/Li-Ion) | 93/75 kg |

It's never too early for sustainability

This is why we incorporate our corporate responsibility into the development of even the smallest machines in our wide range, including the new walk-behind scrubber-drier Scrubmaster B25 – with innovations that set new standards:

- With Eco mode: for low levels of soiling, the machine can be operated efficiently and in an environmentally friendly manner with up to 30% less power. This minimises noise emissions.
- With Hako-AquaControl: the Scrubmaster B25 saves up to 50% water during operation.
- With Hako-AntiBac® (optional): equipped with our antibacterial tank feature, the machine meets the highest standards in terms of hygiene while reducing the development of unpleasant odours.
- With a view to the entire life cycle: when developing our machines, we think from start to finish – from production with environmentally friendly, CO2-saving processes in modern plants to economic, eco-friendly use, recycling and disposal.
