DELTA
Cleaning System

Scrubmaster B5

Cleaning deep into corners with new cleaning technology

Walk-behind scrubber-drier for small areas and corners

DELTA Cleaning System

The cleaning tools make the difference

Compared to rotating systems, the double-orbital cleaning system reduces energy and water consumption. At the same time, it increases the stability of the brushes: they do not fold over during use and do not stick together. The result: less wear, less microplastics and a noticeably better cleaning quality without smear marks thanks to cleaning via the brush tip!

Flat, manoeuvrable, flexible:
thanks to its flat cleaning head and swivelling operating handle.

More hygiene: with Hako-AntiBac®, the antibacterial tank feature.

The Scrubmaster B5 has been awarded the AGR (Healthy Back Campaign) quality label for the ergonomic overall machine concept.

Lightweight: The operating handle can be moved sideways effortlessly and is mechanically relieved during the cleaning travel, which makes it easy to clean right into every corner.

Intuitive and equipped with only the necessary functions:
the clearly arranged control panel of the Scrubmaster B5 ensures easy operation and little training time.

Uncomplicated: the solution and recovery tank can be easily removed via the carrying handle. The solution tank can be easily filled, emptied and cleaned at the washbasin and parked safely on the floor.

Clean can be this easy

With its patented Hako Delta Cleaning System, the Scrubmaster B5 makes even narrow and angled areas accessible for machine-assisted cleaning. Thanks to its great agility, outstanding manoeuvrability and low effort for the operator, the machine achieves excellent cleaning results with optimised area accessibility, because the double-orbital system with a flat, triangular cleaning head enables cleaning close to walls, right into corners and even under furniture or superstructures with a floor clearance of as little as 120 mm.

The flat, triangular cleaning head and the new orbital drive system enable cleaning close to walls and deep into corners.

Highlights:

- The new drive technology Delta-Cleaning-System reduces the wear of the cleaning tools and saves water compared with rotating systems.
- Easy to transport: with a centred carrying handle for transport up stairs or into the boot of a car as well as a lockable operating handle and transport wheels.
- Simple to replace: the lithium-ion battery with battery charge indicator is easy to reach and can be changed without tools.
- Can be used everywhere: with Silent mode for noise-sensitive areas
- Antibacterial tank feature Hako-AntiBac® for high hygiene requirements
- Hygiene: all medium-carrying parts, such as hoses, can be easily replaced and cleaned, thus meeting maximum hygiene requirements.

Perfectly shaped

The lithium-ion battery is designed to fit exactly on the delta shape of the cleaning head. This means it can be changed quickly and easily.

Scrubmaster B5	
Working width	43 cm
Theoretical area output	approx. 900 m ² /h
Solution/recovery tank	5/5 l
Nominal voltage	24 V
Battery capacity	12.8 Ah
Battery runtime	approx. 50 min
Dimensions L/W/H	600/560/1,165 mm
Empty weight	21 kg

A Hako floor sweeper is shown in a modern building lobby with large glass windows and lush greenery. The sweeper is orange and grey, with the Hako logo on its side. The Hako logo is also prominently displayed in the top right corner of the page.

Hako

Quality of life for all through cleanliness and safety

For around 80 years, Hako has been providing innovative machines and services in the Cleaning and Municipal Technology sectors. The company is one of the leading manufacturers of machines for industrial, building and outdoor cleaning, as well as grounds maintenance and winter services. New solutions in the fields of autonomy, electromobility and digitalisation complement the portfolio. Hako stands for high product quality and reliable service. Sustainability requirements are addressed through continuous product and technology development.

We are also active in the Municipal Technology sector

Our flexible, manoeuvrable sweepers and compact, multifunctional implement carriers and municipal vehicles ensure clean and safe public spaces all year round – supported by efficient weed control equipment to maintain a well-kept urban environment.
